

Company

Quince is a one-stop retail activation agency. We take care of strategy, branding, print, interactive, (b2b) events and software for major international brands from the Telecom, IT and Consumer Electronics industry.

Quince is a unique, people-oriented company, which is reflected in loyal clients and a low staff turnover. Passion in your work, challenging yourself, taking responsibility, respect, having fun and exceeding expectations are core values. Quince continuously invests in personal growth and in the latest technologies. More than 75 employees of various nationalities work at the headquarters in Amsterdam-Zuid and the branch in Budapest.

Job function

As an Allround Java/Grails/Android developer you will work on innovative e-learning solutions. Our platform, used by a number leading telecom and consumer electronics brands, is actively being used by more than 100.000 users worldwide to keep their knowledge up-to-date. Our technology stack (consisting mostly of HTML5/Javascript, Grails and Android) is used to create an environment which uses gamification techniques to engage our client's sales staff. You will join a team of 10 people (including 5 other developers) to help us grow the platform in 2014.

Within Quince you will work along with a large group of developers on back-end, front-end and mobile solutions. They all share a common interest in multiple software languages and environments such as PHP, Java, Unity, Grails, ActionScript, HTML / CSS / JavaScript, Android and IOS. You also collaborate with designers and copywriters. Project leading is kept as much as possible within the team.

As a new member of the team you will initially be linked to an experienced colleague, so you can quickly become familiar with our company and our particular way of working.

Job requirements

- As an Allround Developer you are practical, smart, entrepreneurial and willing to take responsibility;
- You have an higher education level and at least 2 years work experience;
- You have experience with front-end, back-end and mobile development; Java and Android;
- You have experience with databases (MySQL, Oracle, MongoDB, etc.);
- Basic understanding of Spring/Hibernate and Grails;
- Basic understanding of Linux;
- You're able to unit(test) your own software.

Offer

Quince offers a competitive salary, which can rise as a result of professional, but especially personal growth. Quince has an open and stimulating company culture and barely knows hierarchy. You will be working in an inspiring, spacious environment with various facilities for after work relaxation, including a private bar and a professional fitness room.
